

Ezi-action® Frequently asked questions

Why are the Ezi-action® Drumpumps better than any other hand pump?

Reliability, durability, safety, 24 month manufacturer's warranty and full serviceability differentiate the Ezi-action® Drumpumps. You can be confident that Ezi-action® Drumpumps are supplied by a company that believes in giving the customer more than they expect.

What fluids can be dispensed?

The range of liquid products being dispensed with Ezi-action® Drumpumps expands all the time. If it is fluid even if viscous, gritty or containing mild solvents it can be pumped. Ezi-action® Drumpumps are made from FDA compliant plastics. Check out the following list:

- Acids
- Alkalies
- Alcohols
- Antifreeze
- Apple cider vinegar
- Aviation maintenance chemicals
- Car wash chemicals
- Cleaning chemicals
- Dairy hygiene chemicals
- Diesel
- Food oils
- Formic acid
- Glyphosates (Round-up®)
- Industrial processing chemicals
- Liquid fertilisers
- Liquid foods
- Lubricants
- Molasses
- Pesticides (oil and water based)
- Propionic acid
- Sanitation chemicals
- Swimming and spa pool chemicals
- Turf maintenance chemicals
- Water treatment chemicals

How is the adaptor fitting determined?

Adaptor fittings for the Ezi-action® Drumpumps are available to suit the openings of drums and containers from around the world.

For drums with male adaptor fittings measure the overall outside dimension of the thread portion of the drum's bung.

For containers with the cap adaptor fittings measure the clear internal diameter of the container cap.

Can solvents be pumped?

It is not recommended that the Ezi-action® Drumpump be used in strong solvents, petrol or flammable liquids.

Chemicals containing mild solvents are pumped with Ezi-action® Drumpumps. The concentration of the solvent and the length of time the Drumpump is left in the container will determine whether the Drumpump will continue to pump that product.

Can viscous fluids be pumped?

Due to their revolutionary but incredibly simple pumping principle, Ezi-action® Drumpumps will pump viscous products including molasses and oil to 8,800cps.

Can the Ezi-action® Drumpump be serviced?

Ezi-action® Drumpumps are fully serviceable. This differentiates them from other hand drum pumps on the market. Servicing may never be required. But some chemicals can be harsher on the polyethylene components. Should pumping cease or fluid be visible on the plunger shaft the Ezi-action® Drumpump is easily serviced.

Ezi-action® Frequently asked questions cont.

Will the Drumpump siphon?

Yes. By fitting a hose to the spout the Ezi-action® Drumpump will siphon.

How does the Ezi-action® Safety Measure bottle secure to the Drumpump?

The Ezi-action® Drumpump can be supplied with the unique safety measure spout that uses a bayonet fit to secure the one litre Ezi-action® Safety Measure bottle.

The Ezi-action® Safety Measure Kit will convert the standard Ezi-action® Drumpump.

What is so revolutionary about Ezi-action® Pumps?

All Ezi-action® hand pumps incorporate the same patented pumping principle.

They are ingeniously simple, direct, double

action pumps manufactured entirely from high quality, chemical resistant, FDA compliant plastics. The pump has no conventional piston with close fitting mechanical seals. They offer easy, fast pumping.

Why is the Ezi-action® Powder Measure the latest concept in powder measuring?

The Ezi-action® Powder Measure is adjustable and allows excess powder to be gently shaken away from the user. It is another excellent marketing tool adding value to powders and promoted to prevent wastage and overuse.

Is there a parts diagram for the Ezi-action® Drumpumps?

Yes. A parts diagram can be found inside the Header Card.
